PROJECTS

Asset Management System (XYZ Company)   **Live | Client-site | Server-site**

 A web app to help HR track company assets and manage employee records, enabling employees to request and return assets easily.

- **Efficient Tracking:** Manage assets & employee records
- **Seamless Management:** HR can allocate, track & monitor
- **Built for Performance:** Powered by React, Node.js & MongoDB

Blogger Management Website (Galaxy Blogger)   **Live | Client-site | Server-site**

A React, Firebase, and MongoDB-powered platform for reading, writing, and engaging with blogs.

- **Share & Explore:** Read, write, and manage blogs
- **Engage:** Authenticate, comment, and save favorites
- **Optimized Performance:** TanStack Query enables efficient data fetching.

E-commerce App (Coupon Collecting)   **Live | Client-site | Server-site**

A smart e-commerce app offering deals, wish lists, search, and dark mode for a seamless shopping experience.

- **Smart Shopping:** Explore brands, sales, and coupons
- **Personalized Experience:** Wishlist, search, and dark mode
- **Responsive Design:** Fully responsive with Tailwind CSS for mobile and desktop users
